

Activity 1

Adverse Childhood Experiences (ACEs) Questionnaire

Objective:

- Self-knowledge is the first step toward recognizing the effects of ACEs on a personal level and realizing the need to develop strategies that help to cope, calm, and heal. The *ACEs Questionnaire* is a valuable tool widely used to help individuals determine their own personal ACEs score.

Steps:

1. Distribute the questionnaire and pens/pencils to each participant.
2. Briefly explain the purpose of the questionnaire and reassure participants they will not be required to share their results with anyone.
3. Allow time for each participant to complete the questionnaire.
4. Explain how each person may determine their score.
5. Ask the following questions for quiet reflection:
 - Did you realize anything that you were not expecting?
 - Are you surprised at your final score?
 - Do you believe your own ACEs score influences your level of personal well-being?
